### Safety

- Hydroelectric facilities can be dangerous. Obey all posted signs, and avoid the danger areas above and below Comox Lake Dam, Puntledge Diversion Dam and the Puntledge Powerhouse.
- Boaters in Comox Lake reservoir should be aware of shallow channels, exposed stumps and floating debris.
- Water releases may occur suddenly without warning downstream of the Puntledge River Diversion Dam. This increases currents and creates dangerous conditions for recreational river users.
- If you hear a siren, that means the water level is rising
